• **Comments:**

Allan,

I have marked up a copy of the draft that you sent me. I also included a list of notes which are referenced in the marked up draft where I need more space.

If you have any trouble at all reading the fax, please call me and I can send the material via courier.

Overall, things look pretty good. I am a bit unclear on one major item (G in my notes).

I will call you and we can discuss how we should proceed from here.

Regards,

Ray

Thank you for your detailed comments provided to me in your facsimile of May 2, 2000 and for the further information you provided in our telephone conversations May 3, May 9, May 11 and May 29, 2000.

Please note on page 2 of the draft I have included an example of what might include a privacy violation.

In the claims, I have narrowed all of the claims to specify "access control" information or cookies, and have added a limitation to claim 1 pertaining to the use of this to protected information. I hope this is the scope you had in mind.

Enclosed herewith is a Declaration and Assignment which need to be executed by the inventors by signing and dating these forms where indicated. The Assignment document also requires witness signatures. **Please do not execute these documents until we have agreed that no further changes to the draft are required.** Please check the Declaration and Assignment to ensure that the information contained therein is correct. If any information is incorrect, such as the spelling of your name, please mark the changes on both documents and initialize the changes. In the meantime, please give me a call if you have further changes you would like made to the application.

Please also note I require an identification of all the prior art of which you are aware which might have a bearing on the patentability of the invention. This does not require you to actively search for such prior art. Please provide this to me when you execute the formal documents.

Yours very truly,
